

SR2 Portable Studio Package

KEY FEATURES: The SR2 is our fully portable studio package. It offers all the benefits of a traditional broadcast radio studio but with the flexibility to pack the whole lot away in to some flight cases and boxes for transport or storage.

It comes equipped with an SRM mixer, Myriad software suite, rackmount PC, 22" touch screen, Myriad control keyboard, your choice of CD, USB & MP3 player, 3 x microphones, integrated 'mic live' light and all the other studio equipment that you need.

It is also fully secure with all equipment being housed in lockable draws or cupboards. Like all the studios in the SR range, the SR2 includes onsite installation and training, 12 months free web streaming and a 12 month Aftercare package

This package provides an ideal small scale radio studio that is simple to setup, and being fully portable makes it a secure solution to allow it to be used on a range of different projects and locations.

Other Options Worth Considering

Professional Audio Level Processing – Make your station sound as good as possible!

Medium Level:

The Audessence Podblaster delivers tamper-free, professional audio levelling and dynamic limiting. Includes cables and rack mount kit.

Professional Level:

The Broadcast Warehouse DSPX-Mini provides professional audio levelling and audio processing for outstanding results as good as stations on FM.

Zoom H1 Portable Recorder

Includes SD card, desk stand, 'mic' handle, wind shield, AC power adaptor, headphones & cables. Perfect for use with your MP3 Player / Recorder in the studio Package.

Sound Deadening Packages

To Improve the acoustic nature of the room you have designated as your studio. These fire retardant packages have a significant impact and can be installed onto most surfaces.

Notes

Hotel Accommodation required for the engineer(s), when more than 2 hours journey time from P Squared Ltd.

Please note that a 'Day On-Site Engineering' normally means a maximum working day of 8 hours including travel time to site (but not usually the return leg of the journey). As the situation dictates, engineers can (at their discretion) work a maximum of two additional hours in any given day but only on a maximum of two consecutive days. These limits are imposed to ensure a safe and fair working environment for our employees.

12 Months Free Web stream hosting limited to 30 concurrent streams @ 64kbps mp3, the 12 months commences from the date of your installation. To commence usage of the service you will need to request that it is configured, a password and publishing point will be created and the details of how to set it up will be emailed to you. The PC will require a valid internet connection; this is not the responsibility of P Squared to provide. Larger packages are available on request. An email will be sent to you (after 11 months) offering you additional streaming before the automatic cessation of the service.
